Unloading solar panels

Overview

How are solar modules shipped?

Most solar modules travel thousands of miles from the manufacturing facility to the installation project site. Along the way, they are packaged, palleted, trucked, shipped on freighters and trucked again (and again).

Can you walk on a LONGi Solar PV module?

DO NOT stand or walk on PV modules. Prior to beginning installation, review the Installation Manual for LONGi Solar PV Modules. Do not carry a module alone; always use two people to lift and carry. Do not drill holes in the frame of the module. In addition to invalidating the product warranty, this will also reduce.

How many people should carry solar modules?

And when it's time to start moving the solar modules to be installed, always have two people lift and carry each module. This safety recommendation is imperative as the heavier, large-format modules—which weigh 70 to 80 lbs — become more prevalent at utility-scale project sites.

How can a PV module pallet be safely handled?

the lifting of the pallet and unloading of the pallet. container so the offloading could start. No lifting of the pallets above 100 mm of the container will be needed. distances) and so on until the PV Module pallets in the middle of the containers are reached. safe handling by sustaining stability of the pallet on top.

What is a safe work procedure for solar PV panels with a telehandler?

This document provides a safe work procedure for offloading, loading, and dispatching solar PV panels with a telehandler. It outlines responsibilities and definitions. The procedure specifies that a take 5 risk assessment and job safety analysis must be completed before starting work.

How do I know if my PV modules have been shipped?

Before you unpack your modules, check the shipping label to ensure you received the right modules. Once you unpack your modules, check the module frame serial number and model label against the shipping label. The serial number is the unique identifier of each PV module.
