Uruguay New Energy Storage Investment Plan

Overview

What is Uruguay's energy strategy?

A key element of this strategy is investing in technology and energy storage systems, which will enhance Uruguay's energy security and ensure a stable power supply despite changing global energy dynamics. Sustainability: Uruguay has long been recognized as a leader in renewable energy.

Is Uruguay a net importer of energy?

Once a net importer of energy, Uruguay now exports its surplus energy to neighbouring Brazil and Argentina. In less than two decades, Uruguay broke free of its dependence on oil imports and carbon emitting power generation, transitioning to renewable energy that is owned by the state but with infrastructure paid for by private investment.

How does Uruguay encourage private investment?

Uruguay has taken measures to encourage private investment, within a framework of legal and financial security. Law Nº 16,906, known as the "Investments Law", of 1998, constitutes (together with a series of decrees issued by the Executive Branch) the basic legal framework for investment in Uruguay.

What is the second pillar of energy security in Uruguay?

Reliability and Security: The second pillar focuses on guaranteeing the reliability and security of Uruguay's energy supply. This involves diversifying energy sources and establishing secure international markets to ensure the country's energy infrastructure is resilient to global changes.

How will the energy project shape Uruguay's energy landscape?

Elisa Facio, the head of the ministry, emphasized that the project outlines the key ideas and challenges that will shape Uruguay's energy landscape. One of the primary themes is the projected increase in energy demand, prompting

the need for comprehensive planning and forward-looking policies.

Is Uruguay a repeatable framework of energy sovereignty for developing countries?

Ramón Mendéz Galain believes so. Uruguay's former national director of energy in the Ministry of Industry, Energy and Mining, who was the impetus for the country's shift away from dirty fuels, has been promoting the country's success as a repeatable framework of energy sovereignty for developing countries.
