

SolarMax Energy Systems

Vanuatu Distributed Energy Storage Project

Overview

Supported by the U.S. Department of Energy's National Renewable Energy Laboratory (NREL) and the Australian Department of Foreign Affairs and Trade, this initiative has launched a transformative \$75 million solar generation and battery storage project in Vanuatu. Why is Vanuatu launching a solar farm?

The project underscores the Vanuatu government's commitment to decarbonising the electricity supply and aligning with international climate change goals. Notably, this solar farm represents the final direct-to-grid PV installation that can operate without an accompanying battery. Future projects will necessitate energy storage solutions.

Will solar power boost Vanuatu's energy independence and climate resilience?

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience. New Zealand's Deputy Prime Minister and Minister for Foreign Affairs, Winston Peters, confirmed the country's commitment during a press conference held in Port Vila on Wednesday.

Does Vanuatu have a low electricity access rate?

Vanuatu currently has one of the lowest electricity access rates in the world. Under the RESSET project, New Zealand will serve as the lead donor, providing the majority of funding for the installation of solar arrays and battery storage systems on Efate, near Port Vila, and the island of Tanna.

What future projects require energy storage solutions?

Future projects will necessitate energy storage solutions. The upcoming Renewable Energy Solar and Storage on Efate and Tanna (RESSET) project, following this milestone, will provide an additional 5 MWp of PV generation, complete with a substantial stabilising and energy storage battery of 6.75MWh. Welcome to the discussion.

Vanuatu Distributed Energy Storage Project

Renewable Energy Systems with Storage for Efate and Tanna ...

Led by a consortium of consultants, including TTA, IM3, ECA, and Scinergy Pacific, the project focused on constructing a 1.16 MWDC solar PV farm and a 0.4 MW/2.5 MWh Battery Energy ...
