# What Batteries Are Used in Outdoor Power Supplies

## Overview

---

Are Ope batteries good for outdoor maintenance?

Here's how to power up for your outdoor maintenance needs. Most OPE batteries are rechargeable, and all offer exceptional ease of use and low maintenance. Save time and effort with no cords to worry about and no need for fuel mixing, carburetor cleaning or winterizing at season's end. Here are the main battery types you can choose between.

What types of batteries are used to store electricity in buildings?

To store electricity in buildings, batteries are most commonly used. Examples include lead acid, molten salt (sodium sulphur, sodium metal hydride), lithium ion and flow batteries.

Which battery is best for my Ope?

Explore your options to find the most ergonomic match for your OPE. Also known as lead acid batteries, these 6V or 12V batteries are used in applications where recharging isn't feasible. BEST FOR: Riding lawn mowers, lawn tractors, lawn irrigation and electric fence systems.

Are lithium ion batteries a good choice?

TIP: Compared to other types, lithium-ion batteries have a longer run time between charges, making them a good choice for larger yards and gardens. Cycle life is the overall life of the battery. It represents the number of times a battery can be recharged before its performance degrades. TIP: Proper care helps optimize battery life.

What is outdoor power equipment (Ope)?

Tackle your projects with outdoor power equipment (OPE) that delivers the performance you want. Cordless tools combine convenience and range with improved, next-generation power and run time. They operate more quietly than gas-powered equipment, too. Battery type plays a critical role in OPE

performance.

Why should you use an OPE battery?

Battery type plays a critical role in OPE performance. Here's how to power up for your outdoor maintenance needs. Most OPE batteries are rechargeable, and all offer exceptional ease of use and low maintenance. Save time and effort with no cords to worry about and no need for fuel mixing, carburetor cleaning or winterizing at season's end.
