What are the base stations of China s communication network

Overview

The total number of mobile communication base stations in China reached 9.31 million, with a net increase of 900,000 for the year. Of these, 5.75 million 4G base stations have been built, and more than 600,000 5G base stations have been built. How many 5G base stations are there in China?

With 4.19 million 5G base stations already operational across China, the MIIT emphasized that “promoting 5G revolution and 6G innovation will be one of the priorities” for 2025, according to a report by Chinese newspaper China Daily. Chinese main operators are China Mobile, China Telecom and China Unicom.

How many 5G phone subscriptions are there in China?

China’s 5G mobile phone subscriptions surpassed 1 billion by the end of November, local press reported, citing data released by the Ministry of Industry and Information Technology. The 5G subscriptions now represent 56% of all mobile lines in China, reflecting a 9.4 percentage point increase compared to the previous year.

Does China have a 5G network?

Wen Ku, director-general of the China Communications Standards Association, highlighted the nation’s progress in telecommunications, stating, “China has made remarkable strides in 5G infrastructure, which gives it an unparalleled edge in exploring 6G technologies.”.

What is China's ambitious 5G project?

China’s ambitious project is not just aimed at delivering different types of content to users but also taking its production capacities to the next level. The country has been working to incorporate 5G technology into mining, power supply, and other industrial sectors in a bid to improve efficiency and reduce costs.
