What are the photovoltaic base station cabinets for communication in the Democratic Republic of the Congo

Overview

How many solar panels does the DRC have?

Accounting for a total operating power of 83 kW, the DRC has a total of 836 solar photovoltaic systems installed, with the government looking at increasing capacity significantly.

What is the energy mix in the DRC?

The DRC's energy mix is comprised primarily of hydroelectric power, with the bulk of the country's domestic generation produced from the country's Inga I and Inga II dams located in the Kongo Central Province, boasting an installed capacity of 351 MW and 1,424 MW, respectively, for a combined capacity of 1,775 MW.

What is mobile internet penetration in the DRC?

Mobile Internet penetration in the DRC is at 32.3% and Orange and Vodacom's announcement to construct new base stations in the country aligns with the country's new vision for the digital economy as included in the National Digital Plan Horizon 2025 adopted in 2019.

What is the current exploitation rate of the Congo Basin?

Despite the government's efforts to launch programs to develop the hydroelectric sector and exploit the power of the Congo Basin's numerous rivers, the current exploitation rate of these resources remains less than 3%, demonstrating significant, untapped opportunities.
