

## SolarMax Energy Systems

# What are the wind power sources for Taipei communication base stations

## Overview

---

What is Taiwan's offshore wind strategy?

As the world shifts towards renewable energy, the Taiwan government has developed a national strategy to guide offshore wind development, seeking to install 5.6GW offshore wind capacity by 2025 through three phases, namely the Demonstration Incentive Program, Potential Sites, and Zonal Development.

Which ports in Taiwan support offshore wind?

In Taiwan, the Taipei Port, Taichung Port and Kaohsiung Xingda Port are positioned as major base ports for offshore wind. However, to accommodate the rapid expansion of offshore wind, the Kaohsiung Port and Anping Port in Tainan have also expanded their business to support the offshore wind industry.

Does Taiwan have a nascent offshore wind industry?

Existing marine engineering vendors in Taiwan lack relevant experience in offshore wind, and only two wind farms—Swancor Renewable Energy's Formosa 1 and Taipower's Changhua Demonstration Project Phase 1—have entered the O&M period, suggesting a nascent O&M sector with limited expertise.

Who are the leading WTG suppliers in Taiwan offshore wind industry?

Siemens Gamesa Renewable Energy (SGRE) and Vestas are leading WTG suppliers in Taiwan offshore wind industry. Below content focuses on their business activities in Taiwan and the capabilities of their local partners regarding the components.

Do Taiwanese companies need offshore wind support vessels?

SOVs: almost no Taiwanese companies has invested in construction or installation support vessels. Therefore, in the event of major component

replacement, SOVs still need to be chartered from overseas sources. Taiwan is currently in Phase 2, Potential Sites, with 5.2GW of offshore wind capacity yet to be installed.

Where is the first offshore wind farm in Taiwan?

In 2019, the first offshore wind farm in Taiwan, Formosa I, was inaugurated off the coast of Miaoli, with an installation capacity of 120MW.
