## Overview

---

Does the IBC-LH have a battery cabinet?

In addition, the IBC-LH provides a single battery cabinet solution for 93PM UPS systems 200 kW and below. 93PM 400 kW UPS systems above 200 kW require at least two battery cabinets. The IBC-L and IBC-LH are housed in a single free-standing cabinet with safety shields behind the doors for hazardous voltage protection.

What is an integrated battery cabinet (IBC)?

The Integrated Battery Cabinet (IBC) is available in two model to meet the needs of the Eaton 93PM UPS product line. UPS. IBC-L output protected by 300A circuit breaker. IBC-LH output protected by 500A circuit breaker. The recharge date is also stated on a label inside the IBC.

How many IBCs can be installed in a 93pm integrated battery cabinet?

Standalone IBC installations with three or four IBCs require a customer supplied external tie point and circuit breaker or disconnect between the IBCs and the UPS. Up to four IBCs can be installed in a standalone configuration. Use this procedure to wire standalone 93PM Integrated Battery Cabinets to the 93PM UPS cabinet.

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet as viewed from the front of the cabinet. See Figure 3 for line-up-and-match configuration views. Figure 3. Eaton 93PM 100 kW UPS and Two 93PM Integrated Battery Cabinets.

How many cabinets can be paralleled with a 93pm 100-400 kW UPS?

Up to four cabinets can be paralleled with a 93PM 100-400 kW UPS. Figure 38 shows the UPS and 93PM IBC-L or 93PM IBC-LH intercabinet interface

connection onelines. Battery Detect and DC Shunt Trip wiring should be a minimum of 18 AWG. Four battery cabinets shown. Battery cabinets 5 through 8 are wired the same.

What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.
