# Where can I find outdoor power in East Timor

## Overview

---

Does East Timor have electricity?

The Hera power station was built to supply to the north coast of the country, while the Betano power station supplies electricity to the south coast and the Inur Sakato thermal power station provides electricity to the Oecusse District. ^ "East Timor has electricity across almost its entire territory".

Which power stations are in Timor-Leste?

The following lists power stations in Timor-Leste. The Hera power station was built to supply to the north coast of the country, while the Betano power station supplies electricity to the south coast and the Inur Sakato thermal power station provides electricity to the Oecusse District.

Is biomass a source of electricity in East Timor?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. East Timor: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

How much electricity does Timor-Leste use?

Timor-Leste consumes 125 GWh of electricity per annum, an average of 95 kWh per person. The country has about 270 MW of electricity capacity, 119 MW in the city of Hera. Most of the energy infrastructure was destroyed by the Indonesian militias during the 1999 East Timorese crisis.

What is East Timor known for?

East Timor, officially known as the Democratic Republic of Timor-Leste, is a small island nation in Southeast Asia with a population of around 1.4 million. Despite being rich in natural resources, the country faces significant

challenges in providing reliable electricity to its population.

What challenges does East Timor face?

One of the main challenges facing the electricity supply network in East Timor is its ageing infrastructure. Much of the country's existing grid infrastructure was damaged during the Indonesian occupation in the late 1990s, and since then, little investment has been made in upgrading and modernising the system.
