

## SolarMax Energy Systems

**Which company is good at  
producing double-glass  
modules**

## Overview

---

What is the best double-glass module?

When it comes to double-glass, Trina Solar's double-glass module is the most sought after product in the market. As one of the first batch of companies that promote and commercialize double-glass modules, Trina Solar makes its double-glass modules, which has won industry-wide recognition for its high quality.

Are double-glass modules hard to remake?

Double-glass modules are hard to remake, because they are no longer based on backing sheet," he continued. Yin's confidence comes from Trina Solar's technical strength. During the past 20 years, Trina Solar has been constantly treading on the path of technological innovation, consistently paying high attention to investment in R&D.

Are bifacial double-glass modules a good choice?

There has been a notable shift from the initial single-facial single-glass modules to bifacial double-glass modules. Double-glass modules, with their performance in the face of salt mist, high temperatures and high humidity, have won the market's favour. However, this trend is not without its risks.

Why should you choose double-glass module?

Double-glass module is not subject to potential induced degradation (PID) and boasts of excellent durability, low permeability, long life cycle and other superior qualities. And its many advantages have enabled it to yield unbelievable results in China's subsequent Top Runner Program.

Why do we have higher expectations on double-glass modules?

We have already realized the high shipment goal to lead the industry, now we have higher expectations on double-glass modules. At present, double-glass modules are subject to some non-technical problems, failing to make due and

effective breakthrough. It is a pity.

How many double-glass modules were sold in China in 2018?

According to the statistics, double-glass modules with a total output reaching up to 12GW were sold in China in 2018. With setting up of agriculture-solar PV plants, hydro-solar PV plants, BIPV and other new PV plants, the market scale of double-glass modules will be further broadened ceaselessly.
