

## SolarMax Energy Systems

# Which is the best wind power base station in Maldives

## Overview

---

What will the wind farm do for Maldivia's North Male' Atoll?

The wind farm will produce clean electricity for North Male' atoll, which includes Male' island, the Maldivian capital, the international airport island of Hulhule' and a number of luxury tourist resorts.

What is the Maldives wind farm agreement?

The Maldives' State Electric Company Limited, STELCO, have signed a 20-year agreement with Falcon Energy, whereby Falcon Energy will build and operate a 75 megawatt wind farm in Gaafaru island, North Male' atoll.

What is the wind like in the Maldives?

South-westerly winds reach 15-22 knots. Breathless days are possible during this period; however, if you get lucky with the wind, the Maldives can be a fantastic destination. There are over 200 resorts in the Maldives, but only some boast lagoons that face the wind and have kitesurf schools with rentals and lessons.

Is the Maldives a high wind destination?

Although the Maldives can't be called a high wind destination, it has a decent breeze from May through October. South-westerly winds reach 15-22 knots. Breathless days are possible during this period; however, if you get lucky with the wind, the Maldives can be a fantastic destination.

What will the wind turbines do for Gaafaru?

On windy days, excess electricity generated by the turbines will be used to run a water desalination plant, which will produce bottled drinking water. On calm days, a liquefied natural gas plant will provide 50MW of back-up power. The project will provide an economic windfall for the remote island of Gaafaru.
