

## Overview

---

Are solar & storage prices going down in 2024?

According to EnergySage's new Solar & Storage Marketplace Report, prices for both home solar and solar + storage reached record lows in the second half of 2024. EnergySage, an online solar shopping marketplace (and Electrek affiliate) analyzed millions of quotes from installers across the US in its 20th semiannual report.

Should you go solar with a battery storage system?

To limit power outages and make your home more resilient, consider going solar with a battery storage system. In order to find a trusted, reliable solar installer near you that offers competitive pricing, check out EnergySage, a free service that makes it easy for you to go solar.

What are the 2022 PV and energy storage benchmarks?

The 2022 PV and energy storage benchmarks are bottom-up cost estimates of all aspects of PV and energy storage system installations. High and volatile component prices and competition for limited supplies were among the trends that characterized these benchmarks.

How much does a solar installation cost?

Man, US solar customers are really being fleeced for solar installs. In summer 2024, our most expensive quote was \$3.08 CAD / W, after installation, taxes, etc. and before any rebates or grants. That's only \$2.35 USD / W after currency conversion.

What is NREL's new bottom-up PV and storage cost model?

The Solar Energy Technologies Office developed a new bottom-up PV and storage cost model with NREL analysts to make the benchmarks simpler and more transparent in this year's benchmark report. This model expands the benchmarked components.
