

## Overview

---

How much does a solar battery cost in Zambia?

Africa Clean Energy Technical Assistance Facility. (2022). Customs Handbook for Solar PV Products in Zambia. Bloomberg New Energy Finance. (2022, December 6). Lithium-ion Battery Pack Prices Rise for First Time to an Average of \$151/kWh.

Why should German and European service providers invest in Zambia?

For German and European service providers active in the energy sector, Zambia presents significant potential for business development. There are clear needs across the solar energy and storage value chain, including project development and financing, equipment manufacturing, system integration and contracting.

How much power does Zambia have in 2021?

Thus, the installed capacity in Zambia in 2021 is composed as follows: 2,705 MW in hydro-power (including 1,080 MW for the Kariba complex and 990 MW for Kafue Gorge), 330 MW in coal, 85 MW in diesel, 110 MW in heavy oil and 89 MW in solar. In total, about 84% of the installed capacity is renewable.

Does Zambia need hydropower?

In recent years, Zambia has been able to improve its electricity supply but remains largely dependent on hydropower. This dependency represents a risk to the security of supply, as evidenced by the return of scheduled load shedding at the end of 2022 until February 2023, due to low water levels on the Zambezi River.

What companies trade in electricity in Zambia?

Private companies also trade in electricity in Zambia. The largest of these, Copperbelt Energy Corporation Plc (CEC), buys electricity primarily from ZESCO and sells it to the various mines in the Copperbelt Province. It also

operates its own generators, most of which run on fossil fuels.

What is PV production & how does it work in Zambia?

In that case, the PV production is used to reduce the electricity bill and/ or the diesel fuel bill. As of 2022, the cost of diesel in Zambia was around USD 1.5/litre (Global Petrol Prices, sd) and the efficiency of a generator varies between 25% and 35% if operated at at least 30% of its capacity (Skiyllas-Kazacos, 2012).
