

## SolarMax Energy Systems

# Zhongya 300kw off-grid inverter

## Overview

---

Do I need additional accessories for a 300kW solar power plant?

You don't need additional accessories to benefit from it. The premise of providing a complete 300kw solar power plant solution requires: You only need to submit load (electrical equipment) information, pictures/drawings of the installation location, output voltage range, and other data.

What is included in a complete 300KVA solar power plant?

A complete 300kva 300kW solar power plant includes the following configurations: Optional solar mounting support, PV combiner boxes, and cables. PVMARS provides a complete turnkey solar energy storage system solution. After we complete production, the system delivered to you can be used immediately after connections are made.

How much does a 300kW solar power plant cost?

300kW solar power plant costs US\$204,779 – Gel battery design. (Valid for 30 days). Note: If you need a quote for lithium battery design, please contact [solar@pvmars.com](mailto:solar@pvmars.com) to obtain it. Below are the product parameters and pictures of the 300kw solar plant. Strong anti-cracking, heat spot protection.

How much power does a 300kW solar panel generate?

Based on the average lighting time of about 4-6 hours, a 300kw solar panel can generate 1200kWh-1800kWh per day, about 54000kWh per month, and about 648000kWh per year. Solar panels generate power related to the amount of sunshine in your local area. Click on this article to learn more. This is laboratory data and may deviate from actual use.

What kind of battery does a 300kW solar plant use?

The gel battery of this 300kw solar plant is designed with 180pcs 2v2000ah batteries with a total capacity of 720kWh. In addition, PVMARS also offers lithium battery options. If your installation location is limited and you want

more power, our small-volume 720kWh lithium battery is also an excellent choice.
